RF & Microwave Solutions

A New Wave in Component Technology

CORPORATE PROFILE

BroadWave Technologies is an innovative market driven organization with over 60 years of product design and marketing experience. We design and manufacture RF and Microwave coaxial components for the telecommunications, military, and automotive markets. Broadwave consistently develops application specific solutions for these diverse markets.

RED CARPET CUSTOMER SERVICE

Exceeding your expectations is key to our success and your continued success. BroadWave's customer service philosophy is to develop long-term partnerships with our customers based in an atmosphere of communication and teamwork.

CUSTOMER INSPIRED ENGINEERING

BroadWave's engineering team communicates, designs, and provides information to insure that our customers receive the highest level of engineering assistance and service. We maintain a pioneering approach in providing solutions for our customer's expanding requirements and consistently develop application specific solutions.

QUALITY FIRST

Quality results from the commitment of every employee, department, and vendor. We utilize design and document control systems that comply with the intent of ISO 9001 and our environmental policies are in compliance with the intent of ISO 14000.
